

BirdDog Case Study

Company: BuildingLogix (BuildingLogix.net)

About

BuildingLogix is a leading Energy Management & Building Automation Systems (BAS) integrator.

Need

The BAS labor market is extremely tight and highly specialized. BuildingLogix had critical needs for technicians to execute current projects and grow the business.

The Solution

BirdDog recommended its *FASTRACK Source & Score* option, part of the BirdDog Candidate Acquisition & Management System (C.A.M.S.) The *FASTRACK* program is a hybrid solution that leverages technology and in-house recruiting expertise to build a highly qualified pool of candidates rapidly.

After the candidate pool was built and scored according to well defined criteria, the *FASTRACK* team automatically delivered the resumes, notes, and fully scored group of candidates into the BuildingLogix C.A.M.S. Dashboard where their hiring team simply logged in, reviewed the notes, and scheduled interviews.

Savings & Value

"BirdDog has been a great help to our organization and our partner network to find talented people. At BuildingLogix our goal is to help our partners grow their business through BAS integration and providing more complete mechanical, automation, and energy services. The challenge we all face is finding the technical people to fill the gap of the growth we create. Bird Dog has been a great strategic partner for us to work with to find and fulfill the growth we help create. Bird Dog's ability to recruit, interview, and attract talented individuals at a fair and competitive price has been one of the best values we have found in 20 years of growing our business."

Alex Waibel - General Manager BuildingLogix, Inc.
